

WEATHERMAKER TWO ZONE ZONING SYSTEM

INDOOR COMFORT WHERE YOU NEED IT

PERSONALIZE YOUR INDOOR COMFORT WITH CARRIER'S WEATHERMAKER® TWO ZONE.

COMFORT

The WeatherMaker Two Zone by Carrier allows you to personalize your comfort for precise indoor comfort. Every family and every individual has different indoor comfort needs. That's why we designed the WeatherMaker Two Zone to cater to your specific demands. By dividing your home into two separate areas, or zones, the WeatherMaker Two Zone can be set at different temperatures within your home according to season or personal preference, to make your system operate more efficiently. That's important, because the needs of each of these areas can be affected by large windows, high ceilings, positioning of the sun and other variables. With WeatherMaker Two Zone, you'll enjoy enhanced temperature control and economical system performance.

TECHNOLOGY

With a thermostat in each zone, WeatherMaker Two Zone can detect where and when conditioned air is needed. These thermostats send information to a central controller which activates the system, adjusting the dampers in the ductwork and sending conditioned air to the zone in which it is needed. With a non-programmable thermostat, WeatherMaker Two Zone can deliver air at your desired temperature to one zone without disturbing the other. For even greater comfort and control, install a programmable thermostat so you can specify the time of day you desire a specific temperature.

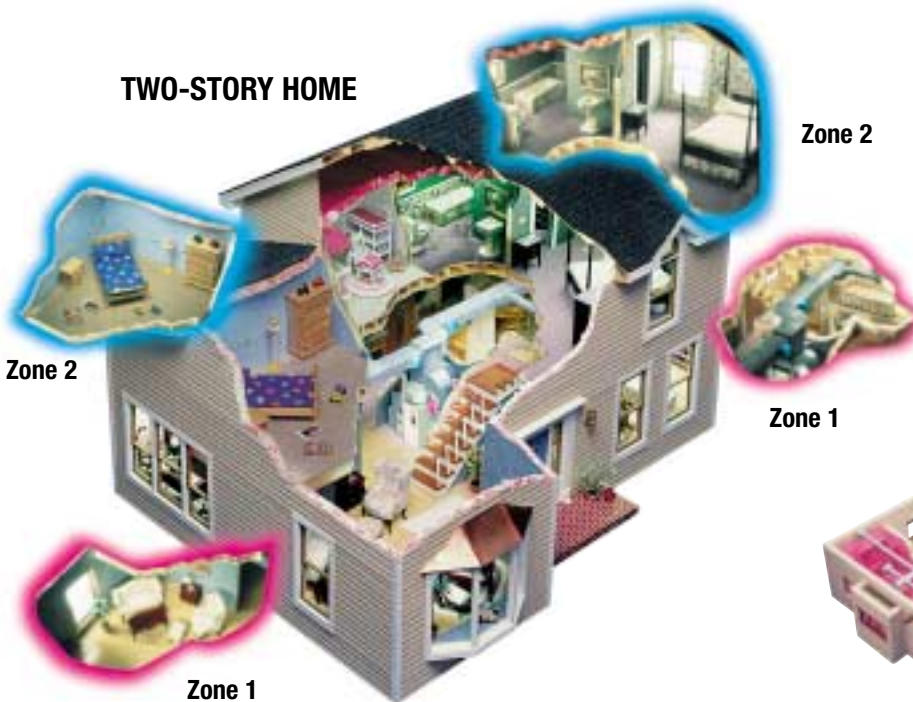

ECONOMY

This method of regulating indoor comfort delivers conditioned air only to the areas in your home where it is required. By providing conditioned air only

to areas that are in use, a zoning system eliminates the needless waste of conditioning unused areas. As a result, you should notice a money-saving improvement in the performance of your indoor comfort system.

SIMPLICITY

With a variety of programmable and non-programmable thermostats available, it should be simple to satisfy your family's indoor comfort needs. All you have to do is enter your family's comfort requirement into the thermostat and let Carrier's zoning system ensure that each zone will reach its set temperature exactly when you expect it. With the WeatherMaker Two Zone, you can maximize the comfort and efficiency of your system. Your Carrier dealer will help you create a system that will deliver precise, indoor comfort.

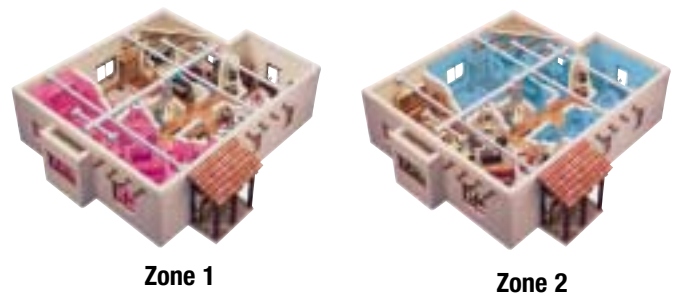

WARRANTY

Carrier is so confident in our zoning products that we back them in writing. Our zoning systems are guaranteed by a **five-year limited warranty**. Extended warranties are also available. Ask your Carrier dealer for details.
